- *Auto Specialties Site, Hartford, MI*
- *Houghton Lake, Paw Paw, and Owosso State Police Post Sites*
- *Americhem Site, Mason, MI*
- *Tekonsha Well Field Site, Tekonsha, MI*

PROFESSIONAL SKILLS AND EXPERIENCE:

Program Management – Mr. Hunt has managed multiple large, multi-site statewide projects, and provided technical, programmatic, and quality assurance management to a variety of clients. He has managed large level-of-effort and project management programs for the State of Michigan Department of Environmental Quality. These were statewide, multi-site (60+) environmental investigation and cleanup contracts worth up to \$40 million each. He has worked closely with clients, state administrators, Federal, state, local, and public stakeholders, and internal project managers and technical and administrative staff to ensure that projects were completed in a timely, cost-effective, and technically sound manner.

Project Management – Mr. Hunt has managed multiple, concurrent, complex projects statewide ranging from \$25,000 to more than \$1 million, developing value-added approaches to achieve project objectives. He has established multi-disciplinary teams of technical staff and subcontractors to meet project goals.

Quality Assurance/Quality Control Management – Mr. Hunt has developed QA plans and QC protocols and procedures to independently verify installed measures. He has established program-specific QC and customer satisfaction goals to meet internal standards and contractual requirements. He has assisted program teams to address any QA/QC issues to remediate identified deficiencies, and streamlined QC paperwork and the data collection, reporting, complaint resolution procedures.

Business Development – Mr. Hunt has managed all aspects of strategic planning, business development, and marketing, implementing marketing approaches to penetrate new market sectors and client types, including a strategy for entry into the other Midwest states and Tribal Nations.

Start-up Manager – Mr. Hunt was key to the start-up and implementation of multiple energy optimization programs for more than 30 public, private, municipal, and cooperative electric and gas utilities under the Michigan Clean, Renewable and Efficient Energy Act. He created and implemented paperless processes to submit, invoice, and reimburse customers and statewide community action agencies for all DTE Energy, Consumers Energy, Michigan Electric Cooperative Association, and Michigan Public Service Commission programs.
